# Unique and innovative hygienic design

## **Hygiene.**

The study of each details in order to be in accordance with the several guidelines of the EHEDG and an hygienic design in line with the actual exigences of the market, makes the entire series of the HY-Q products ideals for the installation in the most several environments.

## **Strenght.**

The innovative external hinge patented and done in accordance with the EHEDG requests, guarantees the perfect alignment of the door and an uniform pressure on the silicon blue gasket to assure the right watertight and also the capacity to keep, on the door itself, a maximum weight up to 70kg.

## **Protection and certification.**

Strenght, hygiene, design but also the certitude of the protection for all the entire HY-Q series certified IP66, IP69 and UL-NEMA 4x,4,1,12.

- 
- A close-up photograph of a door hinge and handle mechanism. The door is dark grey or black with a blue silicone gasket. The hinge is made of polished metal. The handle is also made of polished metal and has a rectangular shape with rounded corners. The background is dark and out of focus.
- :: External hinge patented and realized in accordance with the EHEDG requirements that allows also an opening up to 180°.
  - :: Door, 2m thick, with an hygienic profile and maximum weight capacity up to 70kg.
  - :: Silicon blue gasket FDA and UL Certified.
  - :: Easy to disassemble for the cleaning and sanitizing operations.
  - :: Hygienic locking system.
  - :: Realized with a 30° slooping roof that cover also the door, as specified by the EHEDG directives.
  - :: Internal steel mounting plate realized with the same dimensions of our standard electrical enclosures.
  - :: Patented hygienic system.

# Innovation at the hygiene service

## . Série HC

Hygienic cabinet with hinged door, 30° sloping roof, complete with base and hygienic feet

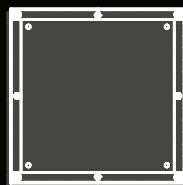

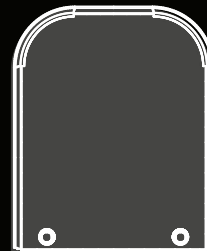

A complete line of electrical stainless steel enclosures realized accordingly to the several guidelines of the EHEDG: pushing button and derivation boxes, enclosures, cabinets and covers for ventilation.

Hygiene, strength, protection and certification.

**PATENT PENDING**

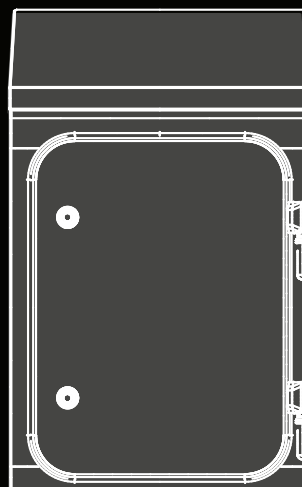

## . Série HF

Hygienic cover for ventilation

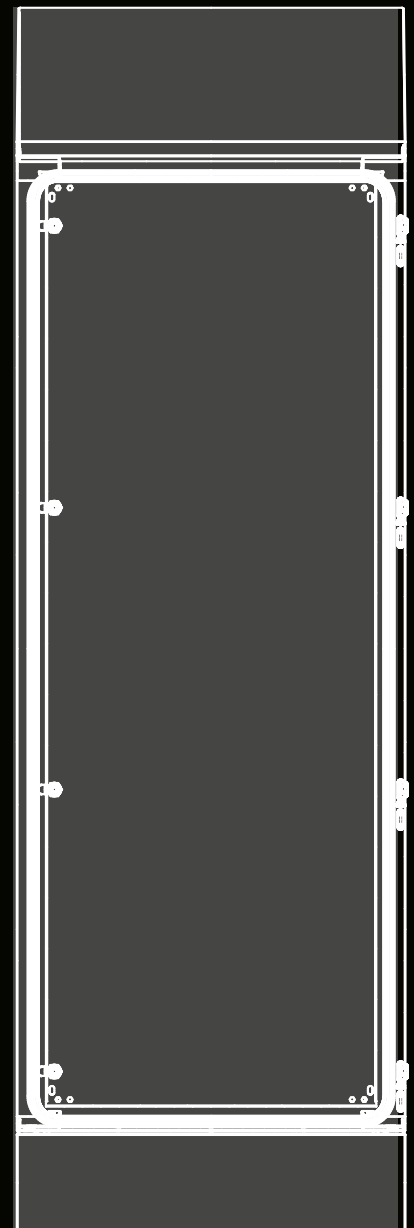

## . Série HJ\_BD

Pushing button and derivation boxes

## . Série HE

Hygienic enclosure with hinged door and 30° sloping roof

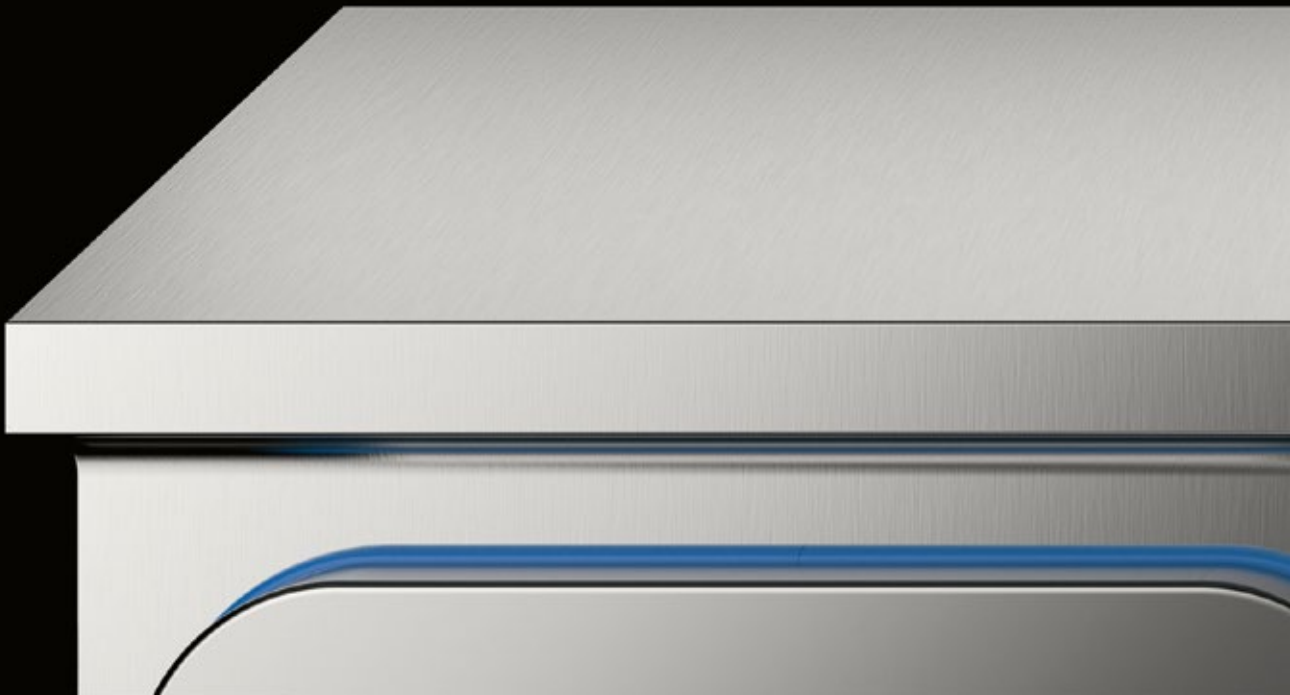

# We have all the needed things

EN 62208

There are some requirements to which we cannot give up. Our certifications are guaranteed for each product of this series, no one excluded.
